

You're a 2024 Preferred Carrier

Thank you for going above and beyond to deliver the best service to your customers

April 23, 2024

Congratulations on being named a project44 Preferred Carrier! You are part of a select group representing less than 2% of the project44 network of more than 230,000 global carriers.

Preferred carriers included this year have demonstrated a commitment to achieving:

- High tracking percentages across multiple loads
- Tracked shipment volume greater than 200 loads per year
- High milestone completeness (ocean only)
- API connectivity (ocean only)

First created in 2020, project44's Preferred Carrier program recognizes the carriers that go above and beyond to provide an exceptional supply chain visibility experience to their customers.

As a carrier in the project44 network, you have access to the following advantages:

- **Win more business:** Receive load requests when you join the marketplace and gain a competitive edge by offering the industry-leading trackability that shippers demand.
- **Reduce check calls:** A project44 integration reduces tracking calls by up to 80% by giving your customers a self-service method for checking shipment status.
- **Onboard in minutes:** Connect and manage how and when you share data with shippers from one platform – and know that project44 tracks loads, not drivers. Our system is compliant with top data privacy and security standards including GDPR, CCPA and ISO27001.
- **Movement for Carriers.** The Movement platform helps you gain network visibility, solve connectivity issues, and deliver outstanding customer experience to your customers.

At project44, we understand the value that an exceptional carrier experience brings to an organization's supply chain operations. Thank you for consistently demonstrating best practices and providing high-quality data to your customers.

Sincerely,

Javier Aresti
VP, Global Network @ project44
